

From time to time, the club receives details about various photography-related events, including workshops, seminars, guided photo tours, and external trips focused on photography. Whenever possible, these opportunities are shared with club members, as they may be of interest to some. It is important to clarify that while we circulate information about these events, the club neither endorses nor officially recommends participation. Members are encouraged to carefully read event details, conduct their own research, and decide independently if an event suits their interests. If there are any questions regarding the event, contact the event organizer as the club is not involved.
