Quick Tip #8

Manage Image Watermarks:

Image watermarks are automatically added to images that are 500x400 pixels or larger:

Always:
- For Public viewing (that is, the viewer is not logged into the website)

Except:
- The image is in a competition – the judges will not see the watermark
- The watermark is turned off for Members' viewing (anyone logged into the website)
  - o This is set by the member

To change your Watermark setting:

- Go to *"My Account – My Account Settings – Update Personal Profile and Organization Options"*
- Scroll to the bottom of the form to *"Image Security"*
- Click on *"Watermark only Public images, not images viewed by members"*
  - o Check mark means this is **ON**
  - o This will allow members who are logged into the website not to see the watermark on your full-sized images (500x400pixels or larger)
